

**RMP & Associates Limited** is an Information Technology Company based in Kingston, Jamaica. The company prides itself in having the technical competence to provide efficient, high quality, leading edge Information Technology solutions, backed by exceptional customer service to its clients.

RMP was founded in 1998, in our years of existence we have aimed our products and services at the vertical corporate market in Jamaica focusing on products and services that would have equal appeal in both Jamaica and the broader Caribbean. RMP was started with the purpose of establishing a Jamaican Information Technology company, capable of delivering complete solutions on par with anything that our North American neighbours can supply, specializing in software development, consultancy and of course the resale of computers and accessories to corporate clients. A goal embodied in our vision –

***To become the leading Service and Consultancy Company in the Information Technology field in Jamaica and the Caribbean.***

This vision is the bedrock on which our company is built. All our corporate strategies are made with this goal firmly in focus. As our primary and guiding strategy for success, we consistently ascribe to provide leading edge IT solutions through technical competence, fast and efficient customer service. This strategy is embodied in our Mission Statement –

***To provide efficient, high quality, leading edge solutions in Information Technology to Jamaica and the Caribbean, while providing exceptional customer service.***

This is a brief introduction to **RMP and Associates Ltd**, who we are and what we bring to the table. Rest assured, that as your technology partner we will always provide you with the best offerings and the most complete IT solutions. It is simply how we operate, and who we are as our motto states, we are “The Solution Providers”.
